## *How it all began*

*Wafic Mosbah Idriss*

What first started as a one man enterprise in the 1930's has today grown to become a leading commercial and industrial group. Wafic Idriss, founder of Widriss Holding, started retailing in cheese and canned foods in a small "kiosklike" store in downtown Beirut. Through his persistence, ambition and hard work, his shop grew to become a giant multi-national corporation that deals primarily with the supply and distribution of foods, amongst other things.

Throughout the generations, the Idriss group has continuously expanded its reach and affairs while passing on and adhering to the traditional values instilled by its early founder: "Innovation, Motivation and Perseverance; the keys to success".

*Then we expanded internationally ...*

# *Quality Trust*

*Widriss S.A.L. provides a one-stop-shop for food products and services, while maintaining the highest standards.*

*The main secret to our success is our understanding and flexibility in adapting and meeting market requirements, combined with the traditional know-how that lies behind the “Idriss” group of companies. We have created a foundation that enables us to not only source superior quality products worldwide at competitive prices, but also allows us to spot opportunities and address gaps in global markets. All in all, this provides our clientele with exceptional goods and services, tailored to meet individual and market demands.*

# *Frozen Vegetables*

*There are occasions when frozen vegetables are mixed with other food types, such as pasta or cheese. Frozen vegetables have some advantages over fresh ones, in that they are available when the fresh counterpart is out-of-season, they have a very long shelf life when kept in a freezer and that they often have been processed a step or more closer to eating. In many cases, they may be more economical to purchase than their fresh counterparts.*
